5 Key Steps to Improve HPV Vaccination Rates

1. **INFORM**
   - **HPV vaccine** prevents cancer in males and females

2. **LEARN**
   - HPV vaccination is a public health priority

3. **COMMUNICATE**
   - Share HPV vaccination benefits with parents/patients at every opportunity

4. **RECOMMEND**
   - Offer HPV first with other vaccines: same way, same day

5. **VACCINATE**
   - Routinize procedures to reduce missed opportunities
